

Controller Use for Discord Nicknames

As a controller on discord, people need to know who you are.

Controllers

When not controlling but online, you're nickname must be you're first and last name separated with a space.

When controlling, you must have your nickname set to the position you are controlling. You can find out what this would be by putting the name of the discord voice room into your new nickname.

Pilots

When on the network but not flying, you must have your nickname set to your first and last name separated with a space.

When flying, you must change your nickname to your call sign. This means the proper 3-letter ICAO code and at most 4 digits. You may also use an appropriate General Aviation call sign.

Staff

As a staff, you must put your full name separated with a space, then a dash and your position{s}.

Here is a list of staffing positions and their abbreviated codes:

Supervisor – SUP

Instructor – INS

Founder – FND

When controlling as a staff member, you must follow the controller guidelines.
